

1

I like to be in America  
Okay by me in America  
Everything free in America  
                                    For a small fee in America  
Buying on credit is so nice  
                                    One look at us and they charge twice  
I'll have my own washing machine  
                                    What will you have though to keep clean?

2

Skyscrapers bloom in America  
Cadillacs zoom in America  
Industry boom in America  
                                    Twelve in a room in America  
  
Lots of new housing with more space  
                                    Lots of doors slamming in our face  
I'll get a terrace apartment  
                                    Better get rid of your accent

3

                                    Everywhere grime in America  
                                    Organized crime in America  
                                    Terrible time in America  
You forget I'm in America  
  
                                    I think I go back to San Juan  
I know a boat you can get on  
                                    Everyone there will give big cheer  
Everyone there will have moved here
