Description :

Three musicians with different backgrounds but united by the same passion of blues and rock from the sixties and seventies. Our set is made of covers but also of original songs from the different members. Each of us has a parallel career with different musics (Arzeur > french songs, Christel and Dominique > traditional tunes from all over the world and ancient music in the duet « Mais où j'ai mis les pieds ? » *But where did I put my feet ?*)

Our main advantages :

Very tight group that can play in almost any kind of area, from a pub to a big stage. Good mobility. We are well equipped in both vehicle and P.A system. The fact that each member of the group plays several instruments and has a large musical experience allows us to perform in different styles though we always put the group's creations first. Furthermore we all speak french, english and german.
